

BUNKER SBS

For bulk loading and unloading of bunkering ships and tankers, for petroleum based products up to 50% aromatic content.

Type SBL is a light weight and very flexible collapsible hose without helix for pressure service.

Corresponds to category L 10 of EN 1765. - Suitable for manual handling, very flexible. The reinforcement is constructed in such a way that the hose keeps its whole diameter even with 1 bar flow pressure. Type SBL is not suitable for gravity discharge and for suction. - Please avoid permanent kinking.

Type SBS is the heavy standard bunkering hose with two steel helices for suction and discharge.

Corresponds to EN 1765 category S 15.

Recommended for crane operated dockside loading and unloading in harbours and refineries. Very robust and kink resistant.
